CYNOSURE® Palomar
Emerge™

Introducing the Emerge fractional laser system, which provides aesthetic treatments with little to no downtime and delivers deep, non-ablative laser micro-beams for fractional treatment.

Intuitive user interface

with easy to use touch screen LCD, and full control of all Emerge treatment functions on the main screen

Portability

light weight (total system weight is 3.6kg), a footprint of 50cm diameter and a total height of only 90cm

No consumables

does not require treatment tip rollers and no topical anesthesia required

Ergonomic design

with moulded laser applicator for operator comfort. All-in-one design containing photonics module, electronics control, cooling system, skin contact sensors, black and white information LCS and actuator button

Full operator control

ability to change energy, pitch and absolute density. Up to 30mJ/mb of power

Tri mode treatment versatility

- Manual stamp
- Auto glide
- Auto stamp with one touch actuator for ease of use

Enjoy refreshed,
beautiful skin with
Emerge – the
fractional laser for
skin resurfacing!

Advantages of Emerge:

- Flexible treatments for several skin conditions
- Well-tolerated, easy treatment sessions
- Options for no downtime and minimal downtime treatments
- Excellent treatment outcomes

Emerge can improve the appearance of:

- Age spots
- Sun damage
- Skin tone and texture
- Wrinkles
- Surgical scars
- Acne scars
- Stretch marks
