

Pellevé delivers revenue generating cosmetic procedures

The Pellevé System offers the proven benefits of radiofrequency (RF) providing your patients:

- Skin tightening
- Wrinkle reduction
- Electroepilation (hair removal)

High return on investment

How much will you charge patients for the following skin tightening treatments?

Full-face	\$1,000
Full-face and neck	\$1,250
Neck only	\$250
1/2 face	\$500
1/4 face	\$250
Décolletage	\$300
Hands	\$300

For those treatments that you anticipate providing, approximately how long will the treatments take?

Full-face	45 min
Full-face and neck	60 min
Neck only	15 min
1/2 face	25 min
1/4 face	15 min
Décolletage	20 min
Hands	15 min

A selection of GlideSafe® handpieces used with the Pellevé, deliver precise treatment to all areas of the face, including the delicate areas around the eyes. Compact and maneuverable, they easily glide over varied contours and let you customise treatments for each patient.

Product Specifications

Height	8.75" (22.2 cm)
Width	11.25" (28.6 cm)
Depth	17" (43.2 cm)
Weight	13 lbs (6 kilos)
Electrical	100-240 VAC, 50/60 Hz
Output Frequency	4.0 MHz Monopolar, 1.7 MHz Bipolar
Output Power	Cut: 120W Blend: 90W Coag: 60W Fulgurate: 45W Bipolar: 120W

Pellevé (RF) Electrosurgery: Precise removal of 'lumps and bumps'

Electrosurgery is the answer for precision, versatility and patient care. It is the application of a high-frequency electric current to biological tissue as a means to cut, coagulate, desiccate or fulgurate tissue.

How our patented radiofrequency technology works

Cellular Radiofrequency Absorption

Introducing the ultimate precision cutting tool for General Practitioners

The Pellevé is an innovative multi-modality system that offers physicians unmatched versatility in a compact design. The S5 platform facilitates scores of procedures with the availability of hundreds of monopolar and bipolar electrodes.

Perform a variety of common procedures covered under the Medicare Benefits Schedule (MBS)

Skin biopsy	MBS Item No. 30071 - 30096
Lesion removal	MBS Item No. 31200 - 31355
Cauterisation	MBS Item No. 53060
Telangiectasia	MBS Item No. 30213

The surgical benefits of Pellevé:

- It has the ability to sculpt precise incisions in very thin, mobile or tension-free tissues such as the eyelid, earlobe or labia¹
- There is minimal scar tissue for excellent cosmetic results²
- Quicker recovery due to less tissue destruction³
- Less trauma with high frequency waveforms limits lateral thermal damage compared to laser or conventional electrosurgery⁴

The Pellevé removes lesions with more efficacy than cryosurgery, laser or chemical treatments.
