# THE NEW STANDARD EMPOWERING WOMEN'S WELLNESS

Meet EmpowerRF, a **comprehensive non-surgical platform** delivering life-changing women's wellness treatments. EmpowerRF is the **most advanced** feminine wellness solution leveraging three complimentary energies:

- **submucosal fractional radiofrequency**
- **intravaginal electrical muscle stimulation (EMS)**
- **bipolar radiofrequency**

This intelligent programmable device is equipped with four synergistic technology hand pieces:

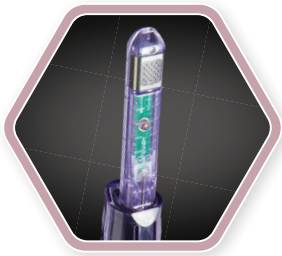

- **Morpheus8V**    • **VTone**
- **Morpheus8**    • **FormaV**

Unlike single energy alternatives, the combination of multiple modalities allows for customized, layered procedures to address a broad range of feminine conditions, including stress, urge, and mixed urinary incontinence (SUI), and pelvic floor weakness.

EmpowerRF is a versatile in-office system designed to improve the functionality and appearance of the delicate female anatomy. With EmpowerRF, physicians quickly perform targeted, efficacious, and safe therapies to restore patient self-confidence and quality of life without surgery or prolonged downtime.

# MORPHEUS8 *v*

Morpheus8V provides intravaginal submucosal remodeling. This fast and effective fractional radiofrequency technology addresses a wide range of internal and external wellness concerns. With a 24 pin matrix of thin gold-coated microneedles and a treatment depth of 3mm, Morpheus8V leverages Morpheus8's clinically proven triple action of electrocoagulation, collagenous tissue contraction, and sub-necrotic bulk heating. In-office, physicians can deliver targeted and precise procedures, achieving surgical-like treatments without general anesthesia or the downtime associated with excisional interventions.

## *Specifications*

<b>Configuration:</b>	24 gold coated micropins
<b>Depth Profile:</b>	1mm - 3mm
<b>Pin Profile:</b>	300um diameter with insulated 0.5 mm conductive tip
<b>Treatment Depth:</b>	Operator adjustable

# *v* TONE

The female anatomy evolves over time due to multiple factors: pregnancy, childbirth, hormonal transformations, menopause, and aging. Inevitably, the female pelvic floor is negatively impacted leading to pelvic floor weakness, stress urinary incontinence, and a reduction in the quality of life. VTone is a gentle, nonsurgical FDA cleared technology designed to provide intravaginal electrical muscle stimulation (EMS) and neuromuscular re-education to rehabilitate weak pelvic floor muscles. VTone's two-sided tip inserts quickly and comfortably into the vaginal canal and delivers the maximum contractions to treat vulvovaginal atrophy. It is a highly efficacious and painless non-invasive procedure physicians administer in-office to improve SUI symptoms.

## *Specifications*

<b>Applicator:</b>	Designed to comfortably treat the female anatomy
<b>Technology:</b>	Electrical Muscle Stimulation (EMS)
<b>Treatment Parameters:</b>	Operator adjustable

# MORPHEUS8

Morpheus8 is a fractional technology for use in dermatologic and general surgical procedures for electrocoagulation. RF energy is delivered through bipolar arrays of pin electrodes, and results in localized heating and coagulation of the tissue that is in direct contact with the pins. Fractional coagulation promotes remodeling while untreated tissue between the pins promotes faster healing. Morpheus8 can positively impact health and quality of life.

## *Tip Specifications:*

	PRIME	MORPHEUS8	RESURFACING
<b>Configuration:</b>	12 Micropins	24 Micropins	24 Micropins
<b>Depth Profile:</b>	1mm - 4mm	1mm - 4mm	0.5mm
<b>Treatment Depth:</b>	Operator adjustable	Operator adjustable	Fixed

# FORMA *v*

FormaV is a comfortable treatment that provides uniform volumetric deep heating for tissue remodeling with real-time temperature control. The versatility of this RF technology allows the practitioner to provide customized solutions to improve tissue health. Patients often see treatment effects immediately, with continued results over the following weeks.

## *Specifications*

<b>RF Output Power:</b>	Up to 40W
<b>Temperature Cut-off:</b>	Operator adjustable up to 43°C

# EMPOWERING LIFE-CHANGING THERAPIES

IMAGINE THE DIFFERENCE  
EMPOWER<sup>RF</sup> CAN MAKE.

## WOMEN'S HEALTH IS A MULTI-BILLION DOLLAR GROWTH OPPORTUNITY

From the onset of the reproductive life-cycle, the female anatomy undergoes a complex range of physiological changes and conditions, often requiring medical intervention and treatment. Approximately 1 in 3 women will suffer from SUI at some point in their lives.<sup>1</sup>

Vaginal atrophy, or atrophic vaginitis, results in sexual dysfunction affecting approximately 50% of postmenopausal women.<sup>2</sup>

The global women's health market was estimated to be worth \$32 billion in 2019, with a CAGR of 4.9% by 2027.<sup>3</sup> Sales of women's health energy-based devices continue to grow as new technologies are developed to address feminine health and wellness issues.
